EDUCATION

Visvesvaraya National Institute of Technology (NIT Nagpur)

B.Tech in Electronics and Communication Engineering; CGPA: 8.3/10

Nagpur, India

Jul 2019 – May 2023

EXPERIENCE

Software Development Engineer

Wells Fargo

Aug 2024 – Present

Hyderabad, India

- Developed Beacon, a React + Spring Boot enterprise observability tool aggregating high-volume synthetic test data from Prometheus and ThousandEyes, maintaining data latency under 2 minutes for near real-time SLI/SLO monitoring and proactive SLA alerting.
- Engineered the Staff Demand Portal, a manager self-service full-stack application; improved the organization-wide metrics aggregator job from 23 hours to 3 hours (87% reduction) and cut managers' report turnaround from a day to minutes with a reliable audit trail of task-IDs and effort.
- Built Automation Hub, a governed self-service platform integrating ServiceNow APIs for safe, centralized execution of automated scripts, aligning execution processes with corporate governance.

Program Associate

Wells Fargo

Aug 2023 – Aug 2024

Hyderabad, India

- Revamped a business-critical React dashboard mapping real-time server topology, hardware health, and active application instances, accelerating live incident triage and minimizing production downtime.

Data Science Intern

Decimal Point Analytics

May 2022 – Jul 2022

Mumbai, India

- Built and trained deep learning models in PyTorch to predict asset and stock prices from financial data feeds.

PUBLICATIONS

Decoding Motion-Blur using Variational Autoencoder | ICCET 2023 | DOI: 10.1049/icp.2023.1496

- Proposed a deep learning method that generates sharp, high-frame-rate video from a single motion-blurred frame and one clear reference frame, offering a software alternative to expensive high-speed cameras; validated on the GoPro dataset.

Survey of Temporal Video Enhancement Techniques (First Author) | ICCET 2023 | DOI: 10.1049/icp.2023.1508

- Authored a systematic review of video deblurring and video generation methods, from classical techniques to transformer-based models, for converting low-frame-rate footage into high-quality, high-FPS video.

VOLUNTEERING

Backend Developer

RenuKiran Welfare Foundation

Apr 2026 – May 2026

Remote

- Helped build the backend for the foundation's education platform: designed and delivered Spring Boot APIs and optimized relational schemas for the trainer, student, and curriculum management modules.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Microservices, RESTful APIs, Spring Data JPA

Frontend: React, Angular, JavaScript, HTML5, CSS

Databases: MongoDB, Oracle SQL, MySQL

DevOps & Cloud: OpenShift (Kubernetes), Jenkins, Harness, GitHub Actions, CI/CD, Git

AI/ML: PyTorch, TensorFlow, Computer Vision, Deep Learning, OpenCV

CERTIFICATIONS

Google Cloud Certified: Associate Cloud Engineer | Issued Feb 2024, valid to Feb 2027

Microsoft Certified: Azure AI Fundamentals (AI-900) | Issued Mar 2024
